Subject: Fw: Logging in Core Ecosystem

Josette Wier,

Thank you for your interest in this amendment. Please note that the proposed amendment was developed by PIR, with input from several government ministries and the Bulkley Valley Community Resources Board to address how to maintain the values of the Core Ecosystems in the face of the mountain pine beetle epidemic. For your interest and information you will find three documents attached that provide further detail on the work done to date to develop the proposal for harvesting in the Quick Core and PIR's proposed operations:

1. Ecosystem Adjustment Proposal: Is a document prepared by PIR which provides the background/rationale for the request to amend PIR's FSP and harvest CP 335.
2. CRB Quick Core Presentation: Is a set of power point slides that were developed for a presentation to the CRB on October 9, 2012. I have removed the pictures from this presentation as discussed this morning to reduce the size of the document.
3. Proposed FSP Section 5.1.1 amendment wording: This is a cut from PIR's FSP Results and Strategies section for Core Ecosystems with the proposed new strategy (c) highlighted in red.printing.

The maps a pictures have been removed from these documents due to file size constraints. If you would like a map of the proposed harvesting please let me know and we can arrange for you to pick it up. If you have any further questions or require additional information please contact myself or Dave Ripmeester.
