

March 8

Hello Jill,

A quick note to let you know that I support the ongoing efforts of the RAMP to develop a plan for the Smithers/Bulkley Valley area.

While the process may be challenging, I believe it is important for the community to have an opportunity to examine our natural resource and the land that surrounds us and identify areas that are important--whether to user groups, wildlife, special plant species or other--and determine a balanced use for the resources that we have. If we don't engage in this difficult process, we stand to lose what we most cherish and what draws both residents and tourists to this area.

I could say more about why I support the process but I will leave it at that for now. If additional comments or attendance at a meeting would be beneficial, please don't hesitate to contact me.

I will also be writing to the Premier, Leader of the Opposition and our MLA to let them know how I feel.

Thank you,  
Dawn Hanson
