Dear Sir:

Regarding the proposed logging in the core area near Lawson Road which was announced recently, I have the following input.

1. I understand the removal of beetle-killed pine and not opposed in principle to it.
2. Logging along Lawson Road has large affects and so I think more time for public input of all stakeholders, including residents in that area, would be appropriate.
3. I do not think that if this logging goes ahead other logging in core areas should be done with a great deal more lead time for input.

Sincerely,
Curt Gesch
