(Letter sent by email)

February 21, 2025

Hello Cam and Tara,

Thank-you for attending the Boards meeting in December of 2024. We appreciate your time in explaining the BuMo FLP process and look forward to more interchange as this carries on. We have reflected on a few comments and were wondering if you could provide us with a link to comments on technical working group updates from the Lakes project.

Having this information available before the BuMo FLP open houses will better enable us to comment on the BuMo FLP process. We note that the Lakes is a different land base but of particular interest are Cumulative Effects and Biodiversity observations.

Working for over 30 years to provide a balanced, accountable interpretation of the values identified in the first landscape-level plan process and its implementation, the CRB is a means of reaching out to our wider community, researchers and field operators for solutions. Our 'lessons learned' could help this FLP to be more successful and identify where specific process improvements could be made.

Please contact our Directors in person or send an email to info@bvcrb.ca with your response.

Regards,

Anne Hetherington

Director, Bulkley Valley Community Resources Board
